CARBON, ALBERTA, THURSDAY, JANUARY 15, 1931

\$2.00 A YEAR IN ADVANCE

PRESIDENT'S TEAM PROVIDE SUPPER

The annual President-Vice-President supper and social evening of the Carbon Curling club was held in the dining room of the Carbon Hotel on Friday evening, January 9th. Owing to the hockey game the program was late in getting started, but the large number present seemed to enjoy themselves just the same and everything went over without a hitch. The annual bonspiel was discussed on this occasion and it was decided that this would be held the first week in February, commencing February 3rd, and lasting till all games are played. In Tuesday evening, the first night of the bonspiel, the Carbon Curling Club will hold a monster dance in the Farmers Exchange hall for the entertainment of the visitors and others entering in the bonspiel. Great preparations are being made for this affair and tickets are being sold by the curlers.

During the evening of the entertainment various members of the curling club were called upon to address the audience and much good advice was given to all curlers both young and old. Community singing was interspersed with the addresses and discussions, making the social evening one of enjoyment to all.

NANCY CARROLL IN "SWEETIE"

Nancy Carroll, Paramount's red-haired cutie, is going to be everybody's "Sweetie" at the Carbon Theatre on Saturday night of this week. She plays the title role in the song-dance-dialo extravaganza of that name, which Paramount recently completed for the delectation of a public hungry for bigger and better New Show World entertainment.

"Sweetie" is a picture that has everything that can come out of the picture showman's bag of tricks—romance, heart throbs, thrills, frills, laughs galore and dancing girls and boys by the score. It has gained the sobriquet in studio circles of "The 'Good News' of the screen."

To use the words of a famous West Coast exhibitor who saw the production in preview, "Sweetie" has got the kind of stuff in it that slays 'em in the aisles—it's a clicker and a wow—and how! While other pictures run for days this one will run for years."

THRILLING DASH TO SAVE MAN'S HAND

A thirty-mile dash on a gasoline "jigger" in the face of a wintry blast is no child's play but when life or limb is at stake such a hardship may be the more easily endured as it is justifiably attempted. Recently, A. Gelade suffered severely from a gashed hand while cutting wood at Brunkild, Manitoba, and in order that every precaution might be taken and the injured member saved, the C.N.R. supplied a "jigger" and rushed the wounded man safely in to Winnipeg. He was immediately operated on at St. Boniface Hospital, and last reports were that he was well on the road to recovery.

World's Wheat Champion Given World Tour

WINNER of the world's wheat championship at Chicago's International Livestock Fair for the second time, Herman Trelle, Wembley, Peace River District, has been singularly honored by E. W. Beatty, chairman and president of the Canadian Pacific Railway, at whose invitation he will make a trip around the world. Trelle, though

related at his outstanding success, attained with hard red spring, was even more pleased with the third he was awarded for hard red winter, which, he maintains, demonstrates the feasibility of raising it in Western Canada and also that he has moved the winter wheat line just 700 miles further north. Insert shows Mr. Trelle and Mr. Beatty.

CARBON WHEAT HAS HIGH PROTEIN

The following figures for protein content of the wheat in Carbon district have been obtained by Roy Wacker, local agent of the Alberta Pool Elevator. Mr. Wacker sent in samples to the Chemist at Winnipeg so these figures are authentic.

Samples	Per cent Protein
No. 1 Hard	16.0
No. 1 Nor.	16.3
No. 2 Nor.	17.8

The following figures show the protein content of Alberta wheat, these figures being the 1930 average.

No. 1 Nor.	13.9
No. 2 Nor.	13.3
No. 3 Nor.	13.0

From the above figures it may be seen that the wheat grown in the Carbon district in 1930 was quite a bit above average.

PLAY BASEBALL AND HOCKEY SAME DAY

Baseball and hockey may be two seasons apart to most Canadian sport fans but on Christmas Day, at Jasper, Alberta, they were separated only by two hundred yards between the open air skating rink and the ball park and thirty minutes intermission to allow for a change of clothes by the players. Two hockey teams, one representing the guides, the other the wardens of Jasper Park, had fought their way to a three-all tie. Instead of playing overtime, the wardens, in from their cabins in the mountains for the holidays, offered to finish the game on the baseball diamond.

Although snow lay all over the peaks surrounding the field and freezing conditions prevailed, a chinook wind from the west had laid bare the ground within a radius of ten miles of Jasper. The diamond, while hard, was in good condition and when the game was called for darkness in the fifth inning, the wardens were leading by a score of 5-3.

PASTURE LAND—5 quarters pasture land for rent. 50 to 75 horses wanted. 75c per head. Emil Yanke, Beiseker.

FOR SALE—Upland Hay, \$11 per ton f.o.b. Phone 1311, E. B. DeWitt Crossfield.

Hockey Notes

Carbon Loses to Beiseker

The Beiseker hockey team (composed of players from Acme, Irricana and Beiseker) played the Carbon Hockey team at the local rink on Friday night last and the All Stars were successful in winning the game 7-4. The visitors scored five goals in the first period while Carbon went scoreless. However, in the next two periods the local boys got down to business and scored four goals, while the All Stars netted two more, making a 7-4 score. Goals scored by Carbon were S. Hay 2, Bruce Ramsay 1 and E. Rouleau 1. The following players were on the Carbon line-up: Goal, Leo Halstead; Defence, Bruce Ramsay and Alex Poxon; Forwards, S. Hay, Wilfred Poxon, E. Rouleau, J. Jones J. Spence, and H. Edwards. Sandy Smith of Three Hills made an efficient referee.

Beiseker and Carbon Juniors Play

Just before the above game the Beiseker and Carbon Junior teams clashed and after an interesting game the Carbon boys came out victorious. We did not get a report of the game or of the final score.

Acme Juniors Win From Carbon

Another game between the Acme and Carbon Junior Hockey teams was played at the local rink on Saturday afternoon and this time Acme boys won from Carbon 7-4. This was the return game and as Acme had no ice it was played on Carbon ice.

Three Hills Beats Carbon

The Three Hills hockey team paid their first visit of the season to Carbon on Tuesday night and provided one of the best games of the season for the local hockey fans. The Three Hills boys came out victorious with a 6-5 score, after a hard struggle in the last eight minutes of play for the winning goal. The regular line-up of the Carbon team played in this game and the goals scored for Carbon were: W. Poxon 2; B. Ramsay 2 and S. Hay 1. Mr. Henderson of Calgary acted as the referee.

Carbon to Play at Three Hills Friday
The Carbon Hockey team will play a return game with Three Hills at that town on Friday night of this week and if the weather holds fine it is expected that a number of hockey fans from carbon will make the trip and take in the game.

FIRST TALKIE TO SHOW IN CARBON ON FRIDAY, JAN. 23

An announcement appeared in our last issue stating that a Talkie film would be shown in the Farmers Exchange hall every Friday evening from now on. This however, was mis-reported, and the Talkie will be shown every other Friday. On these weeks of the Talkie there will be no show on Saturday. Every week that there is not a Talkie film, a regular picture will be shown in the hall Saturday night. The first Talkie will be shown here on Friday evening, January 23rd, and the picture will be Hoot Gibson in "Trigger Tricks." We understand that good programs have been arranged for the Talkie pictures and no doubt the people of Carbon and district will patronize the shows.

Stewart Hay played hockey with the Three Hills team against Didsbury, at that town on Wednesday night.

Pedagogue—Did your father help you with this problem?
Percival—No Sir. I got it wrong myself.

A Turnover Tax

Financial journals throughout Canada are discussing probable ways and means whereby the Dominion Government will raise the revenues required to carry on all the services and administrative responsibilities of the Federal Government, meet the charges on the public debt, and balance the national budget. The same question is receiving the close attention of the Prime Minister and his cabinet, and before long will demand consideration by Parliament and the people generally.

It is admitted in all quarters that the Dominion will face a deficit in the operations of government for the year 1930-31; that, instead of the national debt being reduced, it will be increased. In view of this situation, steps must be taken to devise new sources of revenue because no reductions in expenditure that could possibly be made would, in themselves, be sufficient to offset the decline in revenues which has taken place, and which it is forecasted will continue this year.

This is not a party question; it is a national problem to be faced and solved. Canada is not alone in having to face such a condition; other nations are in exactly the same box.

It is estimated that the Dominion's deficit this year will be in the neighborhood of \$75,000,000. There have been heavy declines in Customs duties, sales tax receipts, excise tax. The income tax yielded a slight increase, but it was payable on 1929 incomes, which were generally greater than in 1930, so that a drop in this source of revenue next year must be anticipated. Furthermore, inasmuch as it is the Government's policy, approved by the people in the last general election, to cut off some hundreds of millions of imports it follows that Customs duties will show a still greater drop this year.

On the expenditure side of the national ledger increases rather than decreases must be looked for. The unemployment relief bill of \$20,000,000 has to be met; Old Age Pensions to be borne solely by the Dominion rather than fifty-fifty with the Provinces, and which will be made effective in all Provinces, means an expenditure of another \$20,000,000 or more; the completion of the Trans-Canada Highway will be an expensive undertaking.

So more money must be found, and a fairly large sum at that. In view of the fact that the Sales Tax has been reduced to a mere one per cent.; that Income Tax returns will be smaller; that Customs duties will take a drop as a result of decreased imports and cannot be depended upon in future to yield the major portion of the national revenue, it is being suggested in Eastern Canada that both the Sales Tax and the Income Tax be abolished in their entirety, and that a new tax, a tax on turnover, be created.

This proposal is deserving of study and should be the subject of discussion by all the people, because it is a tax that will be paid by everybody. It has the merit that no one will be able to escape from it. The other question is, will it be equitable to all in relation to the ability of each and all to pay.

A turnover tax means a tax on every business transaction that takes place in Canada. A Customs tax applies only to articles imported into Canada from other countries; an Excise tax is imposed on only a number of specified articles, intoxicating liquors, tobacco, matches, bank cheques, etc.; the Sales tax is levied on a limited number of transactions. But a turnover tax would mean the levy of the tax on each individual transaction, whether it be on the raw materials sold to the manufacturer, on the manufactured article sold the jobber or wholesaler, on the same article again when sold by the wholesaler or jobber to the retailer, and again when sold by the retailer to the ultimate consumer. It would mean a tax on railway tickets, telegrams, telephones; it is a tax which hotels and restaurants would have to levy; you would pay it to the barber, to the taxi driver, to the newspaper publishers, to the theatre. And so on all along the line every time an article was sold by some person and purchased by another.

The annual turnover of business in Canada amounts to many billions of dollars,—just how large the amount is it is difficult to even estimate. Even a very small tax, a trifling tax, one per cent., one-half of one per cent., one-quarter of one per cent., would yield an enormous revenue. But where an article passes through many hands or avenues of trade before it reaches the final consumer, even a small tax on each turnover might mean a fairly heavy charge in the end.

Possibly certain exemptions would be provided, but the moment exemptions are provided possibilities for evasion of the tax arise; also the danger of discrimination in favor of one class of people, business or industry. The whole subject is intensely interesting, and, as, stated, deserving of close study and full discussion.

The amethyst and violet tinted glass of the ancients owed its color to manganese.

Millions of fish were destroyed by drought last summer in at least 19 states.

An "electric inspector" which detects flaws in bottles has been invented.

England's first census was taken in 1801, when the population was 8,893,000.

Smothering and Fainting Spells Everything Would Turn Black

Mrs. Andrew Black, Harcourt, N.B., writes:—"I had been troubled with smothering and fainting spells and everything in front of me would turn black, and I would fall down in a faint and be unconscious for several minutes. I did not know what to do, until one day I was reading where Milburn's Heart and Nerve Pills had helped so many people and decided I would give them a trial. I used four boxes and found they help me wonderfully."

Was Noted Scientist

Dr. Henry Ami, Canadian Archaeologist, Dies in France

Dr. Henry Marc Ami, one of Canada's outstanding scientists, died recently at Mentone, France, according to news received at his Ottawa home. An archaeologist and palaeontologist of international reputation, Dr. Ami startled the world of science a few years ago by his discovery of evidence tending to show that the Eskimo races, now found exclusively in the Canadian Arctic, at one time lived in France.

In recent years, Dr. Ami divided his time between France and Canada. He was the founder and leader of the Canadian School of Prehistoric History in France, through which he made the archaeological excavations at Dordonne, upon which he based his theory of the early life of the Eskimos.

Dr. Ami is survived by his widow, three grandchildren, Nicholas H. Slater, Clara and Jeanne-Anne Slater, of Toronto, and a brother William Ami, of the University of Manitoba, Winnipeg.

Excavations In Mesopotamia

Interesting Discoveries Reported Of Traces Of Ancient Civilization

Excavation in Ur of the Chaldees in Mesopotamia, have uncovered proof of the existence of buildings and a civilization there prior to the flood described in the Bible, it was announced in London, England.

The announcement was made by officials of the joint expedition of the University of Pennsylvania and the British Museum, headed by C. L. Woolley.

The excavations into the ruins of Ur, it was declared, proved the existence of a civilization in the land which the flood actually covered.

The scientists also discovered interesting tombs of great kings of the third dynasty, about 2400 to 2300 B.C., the report disclosed.

Woman's Fortitude

Forces Herself To Smile Through Pain

"I never seem to find time to rest," says many an overworked housewife. Under smiles and forced cheerfulness she conceals weariness and nervous depression; headaches and backaches. Often she is in real pain, but still refuses to give up. This very fortitude is apt to be her undoing. If she continues to neglect the signals of distress she will sooner or later suffer a serious breakdown.

A noted doctor has stated that nine-tenths of the ills of womanhood are due to poor blood. That anaemia is the cause of the low spirits, the poor appetite and palpitation that make life a burden for so many.

There is no need, however, for women to suffer in this way. All the miseries of anaemia can be banished by taking Dr. Williams' Pink Pills. These Pills create an abundance of new, rich, red blood, and this new blood will bring strength and vitality to nervous, overtired women. The Pills are sold by all medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Will Visit Buenos Aires

The Canadian delegation to the British Empire trade fair being held in Buenos Aires next spring, will reach the Argentinian city in time for the inauguration of the exhibition by the Prince of Wales, March 14. This was announced at Montreal by Angus McLean, president of the Canadian Chamber of Commerce, which is organizing the Canadian party.

Praises This Asthma Remedy. A grateful user of Dr. J. D. Kellogg's Asthma Remedy finds it the only remedy that will give relief, though for thirteen years he had sought other help. Years of needless suffering may be prevented by using this wonderful remedy at the first warning of trouble. Its use is simple, its cost is slight, and it can be purchased almost anywhere.

Great Lakes Herring Catch

The herring catch at the head of the Lakes this fall is estimated at around 2,500,000 pounds. Some of the fish will find their way to the west coast and some to the east coast while orders have also been received from the United States. Between 300 and 400 men have been employed in this industry during the season.

Submarine Grain Carriers For Future Is Visioned By Sir Hubert Wilkins, Explorer

Giant submarines, carrying the grain of the prairie provinces across Hudson Bay, under the ice of Hudson Strait and across the Atlantic some day will keep Churchill, Canada's sub-Arctic port, open all year round, Sir George Hubert Wilkins, noted British explorer, believes.

"I think large submersible grain carriers, of say 15,000 tons displacement, are the only thing if that Hudson Strait route is to be used properly," Sir Hubert told the Canadian Press.

Sir Hubert, who has flown over the Arctic ice and walked on it, expects to prove next summer that it is far easier to go under it.

In his 170-foot submarine, "Nautilus," named after the craft in Jules Verne's "Twenty Thousand Leagues Under the Sea," he will attempt to travel 2,100 miles under the ice, from Spitzbergen to the Behring Sea. The "Nautilus" is now outfitting at Philadelphia, Pa.

She has been remodelled from an old naval type into what will be the summer home of 18 men, six scientists and a crew of 12.

While he has in mind primarily the acquisition of oceanographic and meteorological data, which among other things, will help weather forecasters, Sir Hubert believes the voyage will be valuable also as a demonstration that submarine operation under ice is really practicable. A new scheme of storing air sufficient for two and a half days, he believes, will enable him to show that submersible craft may be navigated for hundreds of miles without being brought to the surface.

"Of course," he said, "I don't expect to see submarines carrying cargo at once, but I do believe that eventually submersibles will be necessary if Canada is to get the most out of Churchill."

"With submersibles," the explorer continued, "it would be possible to operate all year around, while three or four months a year is the most that can be expected of surface craft. In addition to this, the operation of submarines would be cheaper because they would not require ice-breakers to keep channels open for them," he declared.

Sir Hubert remarked that the Dominion government, in building the Hudson Bay Railway had expected a saving of one-and-a-half to two cents a bushel in the shipping cost of grain to European ports. He thought that the eventual placing of submersible grain carriers on the northern route would bring about a slightly greater reduction in the per bushel rate besides offering a total saving in shipping cost three or four times greater than would be possible were Churchill kept open for only a few months each season.

Predatory Animals In The North

The measures adopted by the Department of the Interior to encourage the white and native populations of the Northwest Territories to destroy predatory animals continue to bring satisfactory results. During the past fiscal year, the number of wolf pelts on which bounty was paid (at \$30 per wolf, the pelt being turned into the department) was 938.

Mexico is to have a new coast-to-coast auto highway.

"Your husband dead only a fortnight, and you want to marry again?"
"Yes, mother, but next time I will wait longer."—Buen Humor, Madrid.

King's Speech Preserved

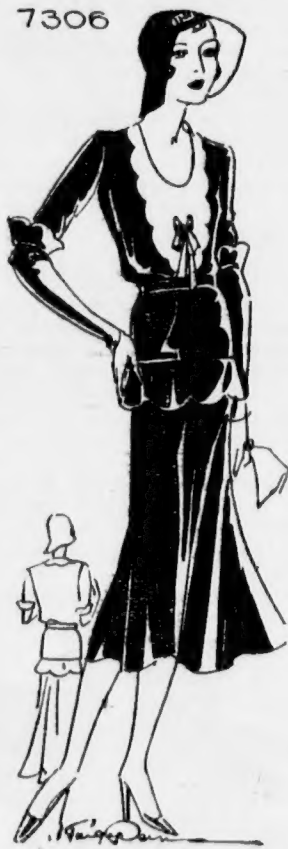

Record Made Of Address At Opening Of Indian Conference

A gramophone record of the speech which the King made at the opening of the Indian Conference in the Royal Gallery of the House of Lords has been sent to Buckingham Palace in a special green leather case. The copper matrix of the King's speech has been sent to the British Museum to be filed away in the interesting collection of famous voices which are being preserved for posterity. In the Museum archives there are many of these voices which will be able to be heard in a thousand years time as well as they are today. Two of the earliest—and they are phonograph records—are of Lord Tennyson, the Poet Laureate, and Mr. Gladstone, who made a speech for the Edison Phonograph Company in 1890.

(By Eva A. Tingey.)

BACK TO BIBS

All Tingey models are created and sketched in Paris and the patterns are made in New York.

Not childishly but in a most sophisticated manner are we back to bibs. They are often part of our very newest frocks.

Today's pattern includes a very charming example. Here on a dress of red marocain crepe is a cream georgette bib. It is very simple to make, for two flat pieces scalloped on the outer side are just stitched together along the curves and turned inside out—et voilà! a most professional effect. A ribbon either of the white georgette or red like the frock (picot edged or bound) can be fastened to the bodice and passed through slots as shown. The slightly shaped scalloped pieces so very modishly placed on the hips and above the elbows are double and treated like the bib.

This pattern may be obtained in sizes 14 to 20. It is ready for immediate delivery. It is hand cut.

Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

Canada's World's Last Great Fur Preserve

Output Has Increased and Supply Equal To Demand

Though the bison is gone forever, and the beaver and marten are slowly following, Canada's fur trade appears to be in no immediate danger of extinction. The state of affairs of a century ago when the value of fur exports exceeded that of any other export has been vastly changed in the Dominion's march of progress. But in that era the output has increased tremendously and government officials at Ottawa say Canada may still be described as the last great fur preserve of the world.

The forward strides made by the fur industry and the accompanying increase in exports might result in the fear that the source of supply is bound for early exhaustion. But fur farming is now furnishing an ever larger supply base to help meet the demands of milady for a new wrap or neckpiece. The retail trade has played its part by popularizing common and even previously despised furs, and by encouraging the use of domestic animal pelts. In this latter category are the rabbit and the pony.

Experiments in the breeding of rabbits for their fur resulted in the production of several valuable kinds. Chief among them is a specie whose fur resembles that of the famed Bolivian chinchilla, and which, under the name of chinchilla rabbit is becoming of high intrinsic value to the trade. Pony fur pieces, usually made from the coat of a "wee horse" common to Russia, have a wide market throughout the world.

A Neglected Market

Opportunity To Develop Export Trade In Hog and Pork Products

Some idea of the opportunity for Canadian farmers to develop the export trade in hog and pork products is afforded by figures with respect to dead meat imports into Great Britain as compiled from H.M. Board of Trade Returns. For the first ten months of 1930, bacon imports reached a total of 7,414,020 cwt., valued at £34,922,063, and of this volume Canada supplied only 87,109 cwt., which had a value of £433,955. During the same period imports of hams totalled 865,035 cwt., of which the United States supplied 715,352 cwt., or more than ten times the 70,968 cwt., supplied by Canada. Incidentally, these are the only two in a long list of dead meat import items in which Canadian contribution was sufficiently considerable to cite separately.—Department of Agriculture, Ottawa.

Jinks—"Old man, you certainly have a wonderful vocabulary."

Binks—"Yeah, I wish I were single again so I could use it."

Oddities Of Grain Situation Shown By Suggestions For Disposal Of Surplus Crop

Canada Colonization Association

Encouraging Report Of Work Accomplished Submitted At Annual Meeting

At the annual meeting of the Canada Colonization Association, held at the Royal Alexandra Hotel, Winnipeg, January 5, Colonel J. S. Dennis was re-elected president; P. L. Naismith, of Victoria, vice-president; and the following directors re-elected: D. C. Coleman, Winnipeg; C. T. Jaffray, Minneapolis; C. N. Bowman, Waterloo; James A. Richardson, Winnipeg; J. N. R. MacAlister, Montreal; S. C. Porter, Calgary; Geo. Walker, Calgary, and W. J. Blake Wilson of Vancouver.

The annual report submitted showed a total of 4,107 families settled on 936,934 acres, the total purchase price being \$35,115,202.00; of this number 489 families were colonized on 92,666 acres during 1930. The purchase price being \$1,962,919.00.

"A thorough check-up of families settled by the association since 1925 shows that only 12 per cent. failed," Colonel Dennis stated at the close of the meeting. "Of considerable interest," he continued, "is that only 16 per cent. of the British families placed failed. The marked results with British families is due to careful selection and constant supervision."

All farms and families colonized were personally visited during the summer and fall by the staff of the association and classified under four headings: "A," successful not requiring further supervision; "B," on the road to success, still requiring supervision; "C," doubtful, still requiring considerable supervision and "D," failures.

While a large number of the families colonized were from Great Britain, northern and Continental Europe, the settlement services of the Canada Colonization Association, as Mr. E. W. Beatty announced at Saskatoon last fall, have always been available for Canadians of agricultural experience and training, who wish to take up farms and follow agriculture as a permanent vocation.

In the province of Manitoba, 1,152 families are settled on 260,919 acres. "The work of the association covers the provinces of Ontario, Manitoba, Saskatchewan, Alberta and British Columbia and is maintained as a subsidiary of the Canadian Pacific Department of Immigration and Colonization," said Col. Dennis.

T. O. F. Herzer was re-appointed manager and A. E. Lover, secretary-treasurer.

Oddities of the grain situation in the prairie provinces are numerous, and the many suggestions for the disposal of the surplus crops run the gamut from a \$1,000,000 purchasing plan—as the contribution of a large commercial firm—to a bushel of wheat for admission to hockey matches of a rural league in Alberta.

With the price of wheat slumping from \$1.40 a bushel value of a year ago to the 50-cent level of today, agriculturists in many areas have found substitutes for its use, promising greater monetary reward than ordinary marketing.

The greatest use and the one likely to bring the most valued monetary return, is the finishing of livestock for market. When high values prevailed, agrarians were content to sell "feeder" cattle, which were finished by the buyer. Today they are feeding oats and barley and shipping their cattle and hogs ready for the scales of the stockyards. Thousands and thousands of bushels have been disposed of in this way.

Some prairie districts have abundance of grain, but lack fuel and money to buy it with. They have found a substitute for the coal of Alberta and the products of the forest areas of Manitoba by burning barley—now at the lowest level in history—in the famed Quebec heaters. A bushel a day is the consumption of the heater, and "it makes some fire," is the comment of one user.

The latest suggestion comes from Calgary, where a "grain products relief association" has been established. Contributions of grain will be sought in rural areas, and with the co-operation of millers, it will be ground for the use of the needy of Calgary and district. Already several thousands bushels of wheat and oats have been donated.

Ye olde miller has come back to Manitoba communities. Farmers in the prosperous years purchased their flour from the town grocer, now they are having their own grain milled and the little community mill—closed for a decade or more—is in business again.

Another suggestion was the "contribute a bushel of wheat to the starving Chinese," but lacking organized effort, it remains "just a suggestion," like so many other plans, to relieve the burden of the tiller of the soil.

For Smut Control

Found That Hot Water Treatment Controls Loose Smut

The modified hot water method for the control of loose smut in wheat has been found effective and satisfactory in experimental work conducted at the Indian Head Experimental Farm of the Dominion Department of Agriculture. This method consists of placing the grain in loosely woven sacks and then soaking it in water at 86 degrees Fahrenheit for four hours to soften the seed and prepare it for the action of hot water. The grain is then transferred to water at 112 degrees Fahrenheit for fifteen or twenty minutes and next into water at 129 degrees Fahrenheit for exactly ten minutes. This last treatment is very important and should be carried out with the greatest care throughout. When the grain is finally removed from the hot water it may be plunged into cold water for a moment and then spread out to dry, care being taken to see that it does not germinate or freeze.

"That man spoiled my marriage." "Did he make love to your wife?" "No, he married our cook, and now my wife cooks."—Sondagsnisse-Sirix, Stockholm.

The two young sons of Premier Mussolini of Italy, Vittorio (left), and Bruno, photographed after they had become bona fide members of the Fascist militia. They are shown in their "blackshirt" uniform.

Genuine Gratitude Compels Tribute.

Mr. Victor Hills, of Thornton Heath, writes:—"For many years I have suffered with that distressing complaint—constipation, and its attendant effects of sick-headache and indigestion. It was a red-letter day for me when a friend recommended me a treatment of Carter's Little Liver Pills, and I can honestly say that results have been truly marvelous. I now enjoy good health and feel that life is worth living. The relief I have experienced compels me to add my sincere tribute." Take Carter's Little Liver Pills. All druggists 25c and 75c red pkgs.

WORLD HAPPENINGS BRIEFLY TOLD

The winter cruise of H.M.C.S. Vancouver started on January 26 to the foreign ports of the Pacific Ocean.

Television will be a commercial proposition within five years according to Major-General Harbord of the Radio Corporation of America.

Canadian art will be exhibited at the British Empire Trade Exposition at Buenos Aires in March and April, 1931.

Deer have become such a pest in certain parts of New Zealand that plans for their extermination has become a difficult problem, and many remedies have been suggested.

For the first time since it was dedicated in 1753, the Mansion House, home of the Lord Mayor of London, is empty, city officials having moved to a hotel while the building is being modernized.

From the land of the midnight sun in Alaska to the pampas of the Argentine will be the route of the international highway now being projected by governments, good roads associations and automobile clubs of the countries concerned.

The authorized fish catch in Saskatchewan lakes, large and small, approximates 10,000,000 pounds a year, according to estimates of the Department. Approximately 1,400 men were employed in Saskatchewan fisheries last year.

Elk, which roamed in countless thousands over the northwest years ago, and which have since been reduced to a few scattered herds, will be given a chance to multiply again on the wild lands of the Queen Charlotte Islands, far from the hunter's trail.

Just Right For Upset Stomach

For after-eating distress, gas, sourness and bloating, the quick and positive neutralizing action of Bisurated Magnesia has proved to be just right! Relief, certain and gratifying, almost instantly follows the very first dose—and a few cents worth obtainable from any good druggist, lasts for a long time.

New Industry

Manitoba To Manufacture Frames, Comb Foundations and Honey Extractors

As a result of the investigations made by the special committee of the Industrial Development Board of Manitoba into the Manitoba honey situation, Manitoba is to have two new industries. One is the manufacture of frames, which were previously purchased in the east, and the other is the manufacture of comb foundations and honey extractors.

SUNDAY SCHOOL LESSON

JANUARY 18

THE MINISTRY OF JOHN THE BAPTIST

Golden Text: "Bring forth therefore fruits worthy of repentance."—Luke 3:8.

Lesson: Luke 3.

Devotional Reading: Isaiah 40:3-11.

Explanations and Comments

John's Preaching in the Wilderness, verses 1-6.—To John, son of Zacharias, the word of the Lord came (he was made conscious that this was God's plan for him), directing him to go to the Jordan, and preach the baptism of repentance unto the remission of sin; thereby, says Luke, fulfilling the words of Isaiah (Isaiah 40:3-5).

"John baptized, that is, he used a purifying rite in connection with his preaching. It helps to remember the distinction between baptism as practised in the Christian Church, and as practised by John. In the church baptism has come to be regarded as a dedicatory rite by some, and by others as an initial and confessional rite. But in the first use of it, by John and Jesus, it was a purifying rite. It was a confession, too, but of sin, and the need of cleansing, not, as later, of faith in a person, or a creed, although it did imply acceptance of a man's leadership. To a Hebrew mind it was preaching by symbol as well as by word."—S. D. Gordon.

The Call To Repentance, verses 7-9.—Our poet Lowell speaks of "A kind of maddened John the Baptist."

To whom the hardest word comes aptest."

and harsh indeed was John's word to the multitude who came to him to be baptized: "Ye offspring of vipers," was the way in which he addressed them. Vipers and serpents, were considered emblems of deceitfulness and wickedness; John called Pharisees and Sadducees by this term because, knowing their natural deceitfulness and cunning, he doubted the sincerity of their motive in coming to him. And he questioned them: "Who thought it worth while to warn you to flee from the Day of Judgment?" The phrase, the wrath to come, recalls the picture of serpents in the fields fleeing before the flames when the stubble is set on fire. The coming of the Messiah was expected to be a day of judgment, Luke 2:23. Since the Pharisees thought themselves so righteous, they should not have feared the judgment; since the Sadducees professed not to believe in it, they should not have been disturbed.

"Bring forth therefore"—if you would escape the wrath—"fruits worthy of repentance," deeds that will prove the sincerity of your repentance.

"A new life is the best and most sublime penitence."—Martin Luther.

The Oil For the Athlete. — In rubbing down, the athlete will find Dr. Thomas' Electric Oil an excellent article. It renders the muscles and sinews pliable, takes the soreness out of them and strengthens them for strains that may be put upon them. It stands pre-eminent for this purpose, and athletes who for years, have been using it can testify to its value as a lubricant.

Fish Farming

New Idea Is Being Promoted In British Columbia

"Fish Farms" are now being promoted in British Columbia. An undertaking is under way to obtain from the Provincial Government a long lease of a small lake which is to be stocked with commercial fish, such as whitefish or lake trout, with a view to providing the general market with fresh fresh-water fish. The fish would be ready three or four years after stocking the lake.

Miller's Worm Powders attack worms in the stomach and intestines at once, and no worm can come in contact with them and live. They also correct the unhealthy conditions in the digestive organs that invite and encourage worms, setting up reactions that are most beneficial to the growth of the child. They have attested their power in hundreds of cases and at all times are thoroughly trustworthy.

An Automatic Electric Plant

South America's first automatic hydro-electric plant, five miles from Juiz de Fora, Brazil, is reported to be operating successfully. It was opened recently when a Brazilian official closed a switch in an electric substation in Juiz de Fora. Since then turbines have continued to spin although there are no human attendants there.

Letter from firm of easy term furnishers: "We are surprised that that money owing to us has never reached us."

Reply from client: "Do not be surprised. The money has never been dispatched from this end."

Saskatchewan Oil Discovery

Another Find Of Oil Reported In the Readlyn Valley

Another find of oil is reported in the Readlyn Valley on the farm of Thomas Powley. It is found that when pumping water a greasy substance comes up with the water and when separated readily ignites.

This greasy substance comes up through a strata of sandstone and this sandstone when split open reveals samples of forest leaves embedded in the rock. P. Bridger, of Readlyn, Sask., opened up some of the sandstone formation and on splitting the rock found the leaves in almost perfect condition. It shows that at some time the whole of the valley must have been a dense forest.

The farmers are of the opinion that gas and oil abounds in huge quantities under the rock formation at less than 500 feet. Mud geysers exist in eight or nine places and seem to be bottomless, continually bubbling with grease and oil.

The Canadian Pacific Railway runs right through the centre of this coal and oil valley from end to end. A government inspector stated that requests have been received to drill in the townsite of Readlyn but so far no permission has been granted owing to the compact nature of the village.

The new find of Thomas Powley is just one mile up the valley from the C.P.R. depot and of course would be less hazardous for exploitation.

Swedish Railways Plant Trees

More than 5,000 fruit-bearing trees and bushes were planted last year by the Swedish state railways. Nearly 200,000 such trees have been planted making the government railroad board the largest gardening establishment in Sweden. The trees are tended by railroad employees.

No child should be allowed to suffer an hour from worms when prompt relief can be got in a simple but strong remedy—Mother Graves' Worm Exterminator.

The Loudest Noise

A Montreal scientist says there is too much noise in the world, but fails to point out that the loudest sound of all is that made by the ticking of the clock in a store that does not advertise.

Canada's Fisheries

The product of Canada's fisheries in 1929 had a total value of \$53,518,521.

Serious Rectal Troubles Often Caused By Harsh Cathartics

ENO is pleasant, gentle, safe and sure.

A daily dash of ENO'S "Fruit Salt" in a glass of water, morning or night, tones up and sweetens the entire system. Acid stomach, fatigue, biliousness, quickly disappear.

ENO'S "FRUIT SALT"

Another Scientific Discovery

Short Wave Radio Said To Cut Virulence Of Diphtheria Poison

Science has opened a hitherto unknown opportunity for short wave radio—a newly found power to cut the virulence of diphtheria poison.

In one sentence this discovery was summarized to the Society of American Bacteriologists by Waclaw T. Szymanski and Robert Allan Hicks of Western Pennsylvania hospital, Pittsburgh.

"Highly potent diphtheria toxin," they stated, "is found to be diminished in strength by the action of short electric waves, 1.9 and 3.76 meters, at approximately 158,000,000 and 80,000,000 cycles per second.

Diphtheria toxin is the poison which causes the disease and is produced by diphtheria bacteria. The radio waves are the same sort which were announced about a year ago as producing artificial fever in human beings.

B.C. Apples For Java

Dehydrated apples shipped by Bulmans Limited, to Batavia, Java, have given such satisfaction that another order for three times the original quantity has been booked. The apples are shipped in five pound tins.

A mosquito that stores up fat in the summer time, like a bear, and then hibernates in the winter in sheltered spots is found in northern Montana.

Flowerpot Island

Island In Georgia Bay Turned Over To National Parks Board

Flowerpot Island, in Georgian Bay, has been turned over to the national parks branch of the Department of the Interior. It is situated at the north end of the Bruce Peninsula, and gets its name from two rock formations that resemble huge flowerpots. They have been formed by erosion by the seas, and have trees growing on the top. The parks branch will reinforce the "flowerpots" as their bases are in danger of being eaten away entirely by the action of the waves.

Try this delightful

MAGIC

Next time you're entertaining, try this delightful Tea Menu, suggested by Miss McFarlane, Dietitian of St. Michael's Hospital, Toronto.

MAGIC BAKING POWDER

Look for this mark on every tin. It is a guarantee that Magic Baking Powder does not contain alum or any harmful ingredient.

TEA MENU
Tomatoes stuffed with pineapple
Graham Gems* Nut Cookies
Chase & Sanborn's Tea

Miss McFarlane says: "My successful experience with Magic Baking Powder dates back many years. Consequently, I always use and recommend it because I know it will give dependable baking results. Even a beginner can use it confidently."

MAGIC
Baking Powder
ensures better baking results

Here is Miss McFarlane's
Recipe for
*GRAHAM GEMS

1 cup flour	1 cup Graham flour
4 tablespoons brown sugar	1 cup milk
3/4 teaspoon salt	1 egg
4 teaspoons Magic Baking Powder	4 tablespoons butter, melted

Sift together white flour, sugar, salt and baking powder. Add Graham flour, add milk, egg and melted shortening and beat well. Half fill greased muffin tins and bake in hot oven at 425° F. about 20 minutes.

FRANCE PAYS FINAL TRIBUTE TO WAR HERO

Paris, France.—France, in a final tribute of love and respect to the "Savior" of Paris, gave Marshal Joffre a national funeral which in its grandeur, reminded of that "Day of Ashes" when the body of Napoleon Bonaparte was brought back from St. Helena.

The body of the victor of the Marne lay, like that of Napoleon, under the great dome of the Invalides, in a disguised sacristy of the Chapel of St. Louis, dedicated to the old crusader king. It was placed there so that Madame Joffre might pray beside her soldier husband in silence.

Some months from now the body will be transferred to "Chestnut Grove," the marshal's country home, where it will be entombed in a mausoleum.

Church and state united to make the last rites of France's loved soldier a full expression of the Republic's gratitude and respect. The thousands of French people who filled the gray old cathedral of Notre Dame and the million or more who lined the route of the cortege from the cathedral to the Invalides testified abundantly the love that Paris bore for "Papa" Joffre.

There was not a foot of standing room at Notre Dame when the arrival of President Doumergue signalled the beginning of the Requiem Mass, shortened at Joffre's own request. The highest officials of the government were here in sombre garb and representatives of many nations, many of them attending as the personal representatives of rulers and sovereigns. Monsignor Joseph Marie Tossier, bishop of Schöns-sur-Marne, read the absolution and gave the final blessing.

Outside in the square in front of the cathedral the cortege formed. Republican Guardsmen in the lead. On either side of the coffin marched a company of infantry, and behind, after the marshal's immediate family, marched the president, members of the government, and the diplomatic corps.

An orderly led "Sorciere," the marshal's horse, caparisoned in black.

There was intense silence as the cortege moved slowly up the Rue de Rivoli to the Place de la Concorde and the Grand Palace, where it turned and crossed the Alexander III. bridge to the Great Square in front of the Invalides. There Louis Barthou, Minister of War, paid the government's eulogy.

He hailed Joffre as a "saviour of world liberty" and said that he was there to "voice the unanimous gratitude of the nation."

After the funeral oration the marshal's body was borne solemnly to the sacristy where it will remain until the mausoleum at Louveciennes is ready.

Mourning for Marshal Joffre was expressed in all the theatres which remained open. Simultaneously in each, at 9 o'clock, an actor appeared on the stage and read the marshal's famous Marne battle order of the day in which he called on the French army to die rather than retreat. A minute's silence was asked, and as it ended the orchestra sounded Taps.

Shipping Into B.C. Decreased

Vancouver, B.C.—Final figures of deep-sea movement into this port in 1930 are now completed by the Vancouver Merchants' Exchange and show a total of 1,188 arrivals, of 4,474,225 net tons. This is a reduction as compared with the two preceding years. In 1929 the total was 1,285 vessels and 4,606,649 net tons, and in 1928 it was 1,325 vessels and 1,663,002 net tons.

Reduction In Prices

Ottawa, Ont.—Hon. G. D. Robertson, Minister of Labor, expressed satisfaction at reductions in the price of commodities, including breakfast foods, that had been effected recently as a result of representations made by the labor department. The probe being conducted by the department under the Combines Investigation Act into the price of bread is expected to be concluded shortly.

Canada Scholarship Fund

Large Amount Being Subscribed To Bring British Graduates Here

Montreal.—Subscription of \$600,000 is now being made in Canada and England, to be known as the "Canada Scholarship Fund," to bring British public or secondary school graduates to Canada for their university education and subsequent entrance to Canadian life.

Canada's allotment of the fund is half of the total, most of which has already been pledged upon condition that a similar amount is raised in Great Britain, according to an announcement made today at McGill University.

E. W. Beatty, K.C., is the chairman of the Canadian committee which also comprises Sir Arthur Currie, principal and vice-chancellor of McGill University.

Brig.-Gen. V. W. Odium, of Vancouver, and Dr. R. C. Wallace, president of the University of Alberta, are members of the committee.

Postpones Flight

Amy Johnson, British Girl Flyer, Will Await More Favorable Weather

Warsaw, Poland.—Amy Johnson, the British girl flyer, has postponed her flight to China until more favorable weather, which she does not expect to have before spring.

She will leave Warsaw by train for Moscow, where she expects to meet Soviet personages interested in her attempt and hopes to get full information necessary for her flight across the Ural Mountains and Siberia.

She expects to return to Warsaw this week, by which time her plane, damaged when it was forced down at Amelin, near here, will have been repaired.

FIVE ITALIAN FLYERS KILLED IN TAKE-OFF

Bolama, Portuguese Guinea, Africa.—Five Italian aviators died and three others were injured at the start of the great aviation adventure which carried 10 seaplanes safely from this point on the West African coast to Brazil.

The Stefani News Agency, official Italian press service, said that two planes crashed shortly after the take-off.

Two others which were forced to land on the ocean, while General Italo Balbo, took the ten remaining ships safely into Natal, were taken in charge by Italian naval vessels. The Stefani Agency said both were expected to be towed to Gerando Noronha, Brazilian penal island, not far from Natal.

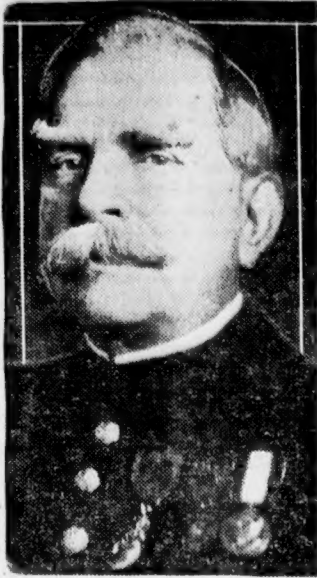

This official announcement by the Stefani Agency clears up the confusion which has existed since Gen. Balbo and his ten ships skimmed to rest at Natal after a speedy trip of 17 hours, 15 minutes yesterday. First reports said that 12 ships left Bolama with two of them landing at sea en route, but later despatches from various sources asserted that two had not been able to take off. The official report shows that 14—two of them were repair and replacement units not scheduled to make the trip originally—took off.

Of the two which met disaster, Captain Renangno took up one from the water, but it dived sharply after reaching an altitude of only about 50 yards. The man killed, a sergeant-major acting as mechanic, was riding above the right pontoon, which was shoved upward and wrecked when the plane dropped to the surface. Captain Renangno, another officer acting as co-pilot, and the radio operator, were injured.

The other unfortunate ship, commanded by Captain Boer, flew all right for about 10 minutes after the take-off, but suddenly was forced to land at full speed.

So sharply did the heavy seaplane slip down upon the ocean, that fire broke out and burned to death the four occupants, Captain Boer, Lieutenant Barbicinti, Sergeant Mechanic Nenis, and Radio Operator Barbicinti. The accidents were attributed to the extremely heavy loads carried.

HERO OF THE MARNE

Marshal Joseph Cesaire Joffre, noted hero of the first battle of the Marne, who died after a short illness in the hospital of St. Jean De Dieu in Paris.

Saskatchewan Village Has Disastrous Fire

Business Section Of Mayfair Is Practically In Ruins

Saskatoon, Sask.—The explosion of a lamp leaves the village of Mayfair, on the new Speers-Rabbit Lake branch, northwest of Saskatoon, with most of its business places in ruins. Before the fire could be checked two general stores, the Bank of Toronto building, and a Chinese restaurant were gutted. An early estimate sets the damage at around \$30,000.

David Cunningham was about to retire when the explosion of a lamp in his store quickly spread rapidly and despite desperate efforts of the villagers who worked a bucket brigade, F. W. Allenby's store and post-office, the bank and restaurant were enveloped in flames. Without any fire equipment the villagers tore down an implement office and so stopped any further spread of flames.

Mayfair, which is 22 miles north of Speers, was established only two and a half years ago when the new branch line went through that territory.

London Service For Joffre

London, Eng.—Cardinal Bourne, archbishop of Westminster, officiated at a requiem mass for Marshal Joffre, at the same time services were being held for the marshal in Paris. Representatives of the Prince of Wales, the Duke of Connaught and other distinguished personages attended.

Toronto, Ontario.—An interesting career that included service in the metropolitan police, London, England; at one time personal body-guard to the King and for the past 25 years a guardian of a local financial institution, is recalled by the retirement of George Cuddy, at the age of 84.

Demonstration Train

Agriculture College Facilities Being Carried To Farmers Over C.P.R. Lines

Winnipeg, Man.—With a view to carrying a college of agriculture facilities to the farmers of North Eastern Saskatchewan, the Canadian Pacific Railway in conjunction with the extension department of the college of agriculture, University of Saskatchewan, is supplying, equipping and moving demonstration and lecture cars especially dealing with poultry and dairying.

Under the supervision of W. H. Boyle and C. E. Thomas of the University of Saskatchewan and three lecturers, the trains left Saskatoon early Tuesday, January sixth, for the first meeting at Ristow, the same day. The train consists of demonstration and lecture cars, the former containing materials for demonstrative purposes for agriculturists interested in poultry and dairying. No livestock or seed is being carried for sale.

A wide range of topics will be discussed, care of poultry, best housing methods, killing and market preparation and, in the dairy section, care and feeding of milch cows, making a cow pay her store bill, testing cows and handling milk and cream.

The train will tour the whole of North Eastern Saskatchewan served by Canadian Pacific trackage and will travel as far east as Bredenburg and leaving there January 13, will journey via Goudie as far north as Nipawin. Leaving Nipawin January 28th, the train returns to Lanigan via Leslie, Wynyard and Dafoe February 4. Leaving Lanigan February 6th, the tour leads as far as Gronlid, February 13, returning to Govan February 17th, and travelling south via Duval, Strasbourg, Bulyea, Balcarres, Neudorf, March 6, to Stockholm, thence back via Imperial and Renown, concluding the tour at Young, March 19th.

Provinces Pay Five Per Cent.

Ottawa Assumes Bulk Of Cost Of Old Age Pensions

Winnipeg, Man.—The Dominion Government in future will pay 95 per cent. of the cost of old age pensions, it was revealed by John Bracken, premier of Manitoba.

Mr. Bracken in commenting on the western premiers' conference here with Prime Minister R. B. Bennett, disclosed that assurance had been given by Mr. Bennett that the provinces would be called upon to pay only 5 per cent. of the old age pensions charges as compared with the 50 per cent. now contributed.

Plane Links Pacific Dominions

Wellington, N.Z.—Guy Menzies, young Sydney aviator, made the first light plane flight between Australia and New Zealand. He took Charles Kingsford-Smith's "Southern Cross Jr." over the 1,200 miles between Sydney and Westland in 13 1/4 hours. He came down in a swamp near Ross, damaging the plane slightly.

A MEASURE OF HOME RULE FOR INDIA PROBABLE

London, England.—Hindus, Moslems and Europeans of India have joined in support of the scheme of home rule for India, which was laid before the round-table conference some days ago by Sir Tej Bahadur Sapru. The same plan, in its essentials, was accepted by Lord Reading on behalf of the British Liberal delegates, but was received by the British Conservative delegates coldly and non-committally.

Gavin Jones, president of the European Association of India, before the conference committee, described the present government of India as hopeless and humiliatingly weak. The country was drifting into chaos, he said. He could see no way out but to give a larger measure of responsibility to the Indian legislature.

Sir Bhupendra Mitra, one of India's leading financial experts, thought no greater safeguards should be imposed on the Indian government than were imposed on Canada when she was created a Dominion. Sir Bhupendra, indeed, termed the new administration "the Dominion government of India."

M. A. Jinnah, a prominent Moslem barrister, declared he was under no misapprehension that India was not going to get either Dominion status or full responsible government. He strongly argued, however, that some of the proposed safeguards were unnecessary.

"It is very commonly said in England," Jinnah added, "that we must either rule India or get out." Let me tell you, you can neither rule India nor get out. Are you going to meet the situation that has arisen in India or not? I say that it will indicate an utter bankruptcy of British statesmanship if you do not meet the situation before you leave."

Jinnah criticized the attitude of Sir Samuel Hoare, the Conservative spokesman. "Sir Samuel said that he would take a non-committal attitude. That was the only contribution he could make to the discussion," he said.

The situation in India was thus summed up by Jinnah:

"There is the position in India: One strong body stands for complete independence. Another solid body stands for Dominion status. Now we have come to you and we say: Are you going to agree to that measure of responsibility which will win over to your decisions the large bulk of these politically united people, so that they will say 'Now we have got something which is worth something; now we have something substantial to work for?'"

Sir C. P. Aiyar also pleaded for responsible government, saying he believed the viceroy should have power to govern in case of a complete constitutional breakdown, but that the ordinary machinery should be left to handle the situation otherwise.

Sir Sultan Ahmed, Moslem barrister, expressed hopes that the British Conservatives in time would come to agree with Lord Reading, Liberal spokesman, in acceptance of the Sapru scheme of responsible government. He also declared the Indian response to Lord Reading's speech had been electric, and Bombay had been particularly pleased.

Warm tribute to Lord Willingdon, the newly-appointed viceroy, for his attitude while Governor of Madras some years ago, was paid by Sir C. P. Aiyar. He remarked that Lord Willingdon had taken all the ministers and the legislature into his confidence, and as a result had secured their willing co-operation.

British Battle Fleet On Cruise

Portsmouth, England.—The British battleship "Nelson" has started on a cruise during which she will visit the United States fleet at Colon, Panama, February 23. The "Nelson," flying the flag of Admiral Sir Michael Hodges, will head a special squadron of seven new battleships and cruisers, the finest Great Britain has ever sent to the West Indies. The squadron will visit each British possession there.

Professional men of Italy have agreed to reduce their fees.

1930 All-Lines Champions

W. T. Warren (left), captain of the Toronto Freight Office First Aid Team of the Canadian Pacific Railway, shown receiving the Lord Shaughnessy Challenge Trophy from W. M. Neal, general manager of the railway's western lines. Toronto Freight Offices won the coveted trophy when as winners of eastern lines championship, they defeated the winners of the western lines championship, Weston Shops, at Winnipeg, in December. The Shaughnessy Trophy is emblematic of the Canadian Pacific All-Lines First Aid Championship and was won last year by the C. P. R. Police team.

EDOUARD J. ROULEAU,
Editor and Publisher

YOUR RESOLUTION

By J. D. Skinner)

"Resolved that my support to the
home-town paper in 1931 will be 100
per cent."

Now this would be a rare and vital
resolution and in the keeping of it
there would be great reward. Rare be-
cause you have never before seen or
heard of it; vital, because the future
of the small town largely depends upon
the keeping of it.

A few years ago an able and arrest-
ing article was written by an editor of
a small town weekly in Alberta.
The business men of the town were
complaining because of the heavy toll
being taken by mail order houses.
During the year the combined amounts
spent by the local merchants in adver-
tising was only a fraction of that spent

in the same area by one mail order
house. The advertisements of the local
merchants had few, if any, illustrations
and lack of care in their preparation
was very much in evidence. On the
other hand the catalogue of the mail
order house was attractively illustrated
and written in a concise and gripping
style. The article clearly demonstrated
why the home town merchant and the
home town were losing out.

A prominent merchant in a small
British Columbia town does not adver-
tise in the home town paper. He con-
tends that it is a waste of money, be-
cause the people in the town and dis-
trict know where to find him. The peo-
ple also know where to find the mail
order house, but the mail order house
is alive to the necessity of keeping its
message constantly before the people.
Here I was told from a well informed
source that more money went out of
town for merchandise than was spent
locally.

A little reflection reveals the fact
that the home town merchant is not
saying that which he does not spend
in advertising, but that he is actually
paying for the advertising done by the
mail order house. How come? Part of
the net earnings of the mail order
house in a given section is used in ad-
vertising in that section. Because of
effective advertising on the one hand
and the lack of it on the other, that
money is being withheld from the
home town merchant, so that in the
last analysis the mail order house ad-
vertises at the expense of the home
town merchant.

Now I am not thinking of advertis-
ing in the sense of contracting for,
paying for and "filling" space in the
local paper. I am thinking of a wide-
a-wake merchant presenting his mes-
sage each week to the buying public
in a compelling style, and if the ad-
vertiser would just visualize an audience
of anywhere from a few hundred to a
few thousand people he would soon
get away from the tragic practice of
"something to fill up this week."

Many of our once thriving towns are
going to stage a comeback in 1931.

This is going to be done through ad-
vertising. Advertising took the busi-
ness away while the home town mer-
chant slumbered and slept, and the
home town merchant has been aroused
and the lost business is going to be
won back through advertising. More
and better advertising will make a
prosperous paper and a prosperous pa-
per will make a prosperous town.

And this is why the people of the
home town should resolve to give 100
per cent to the home town paper this
and every year.

Here and There

(673)

A British Columbia creamery has
recently been awarded a contract
by a Hong Kong firm of provision
merchants for the shipment of 80
boxes of butter per month. For
the past eight years shipments of
British Columbia butter have been
made to Japan and it has sold at a
premium in the markets of that
country.

With the formal opening of the
100 room Cornwallis Inn early in
December at Kentville, N.S., the
fifteenth hotel was added to the
chain of Canadian Pacific Railway
hostelries from the Atlantic to the
Pacific. A grand gala banquet
sponsored by the Kentville Board
of Trade at which nearly three hun-
dred guests sat down including the
Premier of Nova Scotia and Grant
Hall, vice-president of the Com-
pany marked the opening of the
new \$500,000 hotel.

Herman Trelle, of Wembley,
Alta., for the second time took the
title of "Wheat King of 1930" when
he was awarded top honors at the
International Livestock Exposition
in Chicago recently with hard red
spring. Mr. Trelle is even more
satisfied with the third place which
he won in hard red winter by which
feat he is confident he has demon-
strated the feasibility of raising
high grade winter wheat in west-
ern Canada and that he has moved
the winter wheat line 700 miles to
the north. An invitation to take a
round-the-world cruise has been
tendered Mr. Trelle as a mark of
appreciation by E. W. Beatty, chair-
man and president of the Canadian
Pacific Railway.

The Province of New Brunswick's
revenue from motor vehicles for the
fiscal year ended October 31 last
amounted to \$1,591,220, being 21
per cent. greater than the receipts
from the same source in 1929, and
establishing a new high record for
the province, according to announce-
ment made by Hon. D. A.
Stewart, Minister of Public Works.

An old obligation was recently
liquidated by Canada when the sum
of \$67,000 was paid to Commander
Otto Sverdrup, famous Norwegian
explorer, in return for the services
rendered by him in his explorations
and discoveries in the Arctic
Islands. His researches extended
over an area of about 100,000 square
miles and have been of great value
to Canada.

Are You Satisfied With Your Business ?

MOST MERCHANTS ARE FINDING BUSINESS UNUS-
UALLY QUIET JUST NOW. SOME CONSIDER THAT
A REASON FOR CUTTING DOWN THEIR ADVERTIS-
ING SPACE. JUST THE OPPOSITE SHOULD BE THE
CASE.

A MERCHANT WHO BUILT UP ONE OF THE GREAT-
EST MODERN DEPARTMENT STORES ONCE SAID:
'WHEN TIMES ARE GOOD IT IS EASY TO SELL THE
GOODS AND IT ISN'T NECESSARY TO ADVERTISE SO
MUCH, BUT WHEN TIMES ARE DULL ONE HAS TO
GO AFTER THE BUSINESS AND I MAKE A BIG IN-
CREASE IN MY ADVERTISING.'

IN HIS CASE RESULTS CERTAINLY PROVED HIS
IDEA TO BE CORRECT. FOLLOW HIS EXAMPLE.

TELL THE PUBLIC EVERYTHING AND WATCH 'EM BUY

ADVERTISING PAYS. BUT—ONLY IN PROPORTION
TO WHAT YOU TELL IN IT! THAT IS, YOU CAN'T
EXPECT "WHALE" SIZE RESULTS FROM A "FLY" SIZE
AD. FOLKS, IN READING YOUR MESSAGE, WANT
TO KNOW ALL THERE IS TO KNOW THEY
WANT EVERY FACT AND FIGURE YOU'VE GOT TO
OFFER. BESIDES, IT STANDS TO REASON, A LARGE
AD COMPELS MORE ATTENTION AND SELLS BETTER

CHILDREN CRY FOR IT—

CHILDREN hate to take medicine as a rule, but every child loves the taste of Castoria. And this pure vegetable preparation is just as good as it tastes; just as bland and just as harmless as the recipe reads.

When Baby's cry reads of colic, a few drops of Castoria has him soothed, asleep again in a jiffy. Nothing is more valuable in diarrhea. When coated tongue or bad breath tell of constipation, invoke its gentle aid to cleanse and regulate a child's bowels. In colds or children's diseases, you should use it to keep the system from clogging.

Castoria is sold in every drugstore; the genuine always bears Chas. H. Fletcher's signature.

CHAPTER VIII.—Continued.

"Come," he said at last, "take down those hands or I'll do it for you. Sit down, Angela. If you're really suffering, I'm sorry; but you're a good actress, and you've cheated me too many times. I never mention the Ashleys unless you drive me to it, or—or as a warning. God! do you think I want to remember?"

She sank onto a divan, and her arms relaxed. Her husband moved nearer.

"You told me," he said, "that if you had a garden—something to work over—you'd be safe. You were frightened then. You probably believed it. But I can see now that the garden is only a pose. It doesn't absorb you any more than does your painting—or your singing, at which you might do something worth while. Nothing has ever absorbed you but the pursuit of man. If you had a child—"

She looked at him, and her lip curled.

"Didn't you once say that I was not fit to be a mother?"

"You're not; but—"

Her eyes blazed.

"I suppose you'd like to see me turn into a dowl, like that stupid little moron next door. Two babies in four years! I call it indecent. I don't believe she's seen her back hair in a mirror since the first one came. I doubt if she's had a new gown since

the last. I dare say she'll have a third before she has time to see a dress-maker. That sort always does. She's stupid—too stupid to know her own husband—too stupid to see that a man won't stand her untidy ways. Why, by lifting a finger I could have Nick Hastings eating out of my hand!"

"Take care then, that you don't lift it; but I'm not so sure. I thought you lifted more than a finger the other night, and as I told you then—it didn't work."

Angela laughed bitterly.

"Well, I'll show you that it will work, I—"

"You will not! Do you understand? I don't ask you to promise, because I know you don't keep your promises; but I shall watch, and you know, Angela, things don't escape me."

He moved toward the door as if the interview were at an end; then paused, looking back at the blue figure on the divan. Angela's shoulders had drooped in an attitude of such weariness as she seldom allowed herself. Even her eyes looked tired; and at the sight something hovered wistfully across her husband's face—an elusive thing that seldom came there, wiping away the cynicism, leaving in its place a glimpse of something better that fought unhappily for life. He turned, and going to her side, laid his hand gently on her arm.

"My dear—I don't mean to be unkind. Deep in your heart you know that I have never been unkind—don't you? More than anything in the world, Angela, I desire your happiness. There is nothing I would not do for you, if—if you could be satisfied with me—alone."

"You!"

She sprang up, shaking off his hand as if it scorched her.

"You!"

She laughed, scornfully, and sweeping past him without a glance, ran up the stairs.

For a moment James Halliday stood where she had left him. It was not until the sound of her feet was silenced, that he sighed, wearily, like a man who has fought and lost. Then, catching sight of himself in a long mirror, he straightened up, and his lips took on their familiar, unpleasant curve. There was no trace left of the thing that had lighted his face a moment since; and with a shrug that might have been Angela's very own, he went back to his study and the day's work.

CHAPTER IX.

Gay had been gone a month, a month that had brought color to her cheeks and rest to her eyes. She was right in thinking that morbid ideas couldn't live under the same roof with Uncle Sim. His unfailing kindness—his faith in God and his fellow men, was something before which doubt and suspicion faded away. And the Sundays with Nick had been like a repetition of their honeymoon. One never-to-be-forgotten day they left the babies with Uncle Sim and his housekeeper, and tramped off together, as care-free as two children out of school.

"You just leave your responsibilities with Mrs. Bemis and me, and forget all about 'em for a spell," said Uncle Sim. "You'll be all the gladder to pick 'em up again when you get back."

"You bet we will!" said Nick, lifting his youngest responsibility for a kiss. "Come on, Gay. Mrs. Bemis

PILE PAIN

Ends Right Away

"The very first time I used 'Sootha-Saiva' it ended the itch and pain of my piles right away. Stopped swelling and bleeding. Piles now gone."—L. T. Sears. Quickest relief known. All druggists.

knew the ins and outs of infant feeding before you were born. You needn't advise her any further."

"That's right," said Simeon. "Run along now and don't keep Nick waiting. Shant look for you till the cows come home. Gorry! you don't neither o' you look old enough to have two babies!"

"We don't feel old enough—today," laughed Gay, as they turned away. Simeon, Sonny on his knee, watched them lovingly till they turned the corner.

"It's a good thing to be young," he murmured dreamily, "but it ain't bad bein' old, neither, so long as you've got somethin' young around you. Don't hardly know what I'll do when Gay takes these babies back to Bakerville. Wish my old woman could see 'em. Maybe she does. Like as not she knows just how I'm a settin' here with Sonny on my knee. Well, little boy, you want to feed the chickens?"

"Yep," answered Sonny eagerly, and slipping off Simeon's knee, went straight for the umbrella, much to the admiration of his adopted uncle.

As for Gay and Nick, they forgot their cares with amazing ease. They climbed Bear Hill, the nearest approach to a mountain that the vicinity possessed, and later, in the cool of the forest shade, they waded a brook, while Nick built a dam; the task that getting married had interrupted four years before.

It was Gay who reminded him of that long-gone interruption. She sat on a convenient rock, her feet in the water, and watched him work.

"I hated to keep you from building the dam that day, Nick," she said regretfully. "It seemed wicked that you shouldn't do everything that came into your head; but I thought you'd forgotten what was before us, and I was nervous, even while it worried me to stop your fun. It worried me all the way to State Line."

"Idiot!" said Nick, pausing in his absorbing task to throw her a smile of understanding. He worked silently for a while, then stopped to survey the finished product of his labor.

"Some dam, my dear! I ought to have been a civil engineer. Always wanted to, and I bet you, Gay, I'd have made a good one; but uncle wouldn't consider it for a minute."

He came nearer, and sat beside her on the rock.

"Say!" he exclaimed boyishly, "isn't it great being off here together? How cunning your feet look in the water!"

"Cunning!" laughed Gay. "I'd hardly call them that; though beside yours they do look—well, smaller than usual."

"They're small enough; and they haven't been spoiled by the spike heels our fair neighbor persists in wearing. I wonder what she'd think, Gay, if she could see us now!"

Sudden color flooded Gay's face, and she drew one foot up out of sight. "You mean Mrs. Halliday? Why, I—I suppose she'd think it was—impossible."

Nick shook with laughter. "Gay, you're the funniest kid. I bet just remembering Mrs. Halliday and her fastidiousness, made you feel ashamed. Put that foot back. There are no fussy city people around, and I like you just as you are. I wouldn't give a red cent for a wife who wasn't a pal as well. Say, sweetheart, let's bring Sonny up here some day to see this dam."

"I thought you were ordered to forget your responsibilities," Gay answered, as her foot slipped back into the cool stream.

"I don't regard Sonny as a responsibility—today, anyway. He's a good little chum, just as you are. Do you know, dear, sometimes it comes over me how bleak life would be without you all. Just suppose I hadn't gone over to say good-bye to you that morning!"

Gay looked at him, her eyes brimming with tenderness.

"And you so nearly forgot me, darling!"

Nick stared. He had never told her how true that was. Even now, as she slipped an arm across his shoulders, he felt ashamed at the memory.

"Did you think for a minute that I

didn't know?" she questioned gently. "I was in the garden when I saw you come out with that stick and bundle. Could I have misunderstood, after the times we'd planned your going? And when you turned away something—something went dead in my heart, Nick. It seemed so terrible that you could go like that—without a word—when I loved you more than anything in the whole world."

"You—loved me!"

She smiled at his amazement.

(To Be Continued.)

Will Use Canadian Materials

City of Saskatoon Will Insert Special Clause in All Contracts

Acting on a recommendation from the Department of Trade and Commerce, the City of Saskatoon will in future include a special clause in all contracts providing that materials used shall be Canadian products where possible. Permission to use foreign materials will be granted only where sufficient cause is shown.

Crying Babies Are Sickly Babies

The well child does not cry. He is laughing and happy all the time. Baby's cry of distress is the only means he has of telling the mother or nurse he is ill. Mothers, you can keep your little ones well and happy by giving them Baby's Own Tablets—the safe and efficient remedy for all childhood ailments.

Baby's Own Tablets are a mild but thorough laxative. They sweeten the stomach; regulate the bowels and thus banish constipation and indigestion; break up colds and simple fevers; and allay the irritation accompanying the cutting of teeth. They are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Canadian Cobalt

Canada continues to supply practically half the world's requirements of cobalt, the remainder coming chiefly from the Belgian Congo. Practically all the cobalt produced in Canada is a by-product of the silver mining industry and is obtained by treating arsenical silver-cobalt-nickel residues from the Cobalt, South Lorrain, and Gowganda silver camps.

Douglas' Egyptian Liniment, always quick, always certain. Stops bleeding instantly. Cauterizes wounds and prevents blood poisoning. Splendid for muscular rheumatism.

In Honor Of Amundsen

Firing of a 200,000 candle-power aeroplane rocket from the summit of Pike's Peak in memory of the late Roald Amundsen, famous explorer, is the salute for 1931 by the Ad-an-an Club, mountain-scaling organization, of which Amundsen was a member.

At Last! The Truth About PIMPLES

Pimples, acne and blackheads are caused by a rundown, disordered system, by those harmful acids and toxins which make your skin break out. So if you want swiftly to rid yourself of that ugly, blemished complexion and to obtain beautiful, smooth and soft skin for all times—eyes sparkling like diamonds—superb daily health—take Kruschen Salts.

Kruschen Salts are a perfect blend of the six vital salts which nerves, glands, blood and body organs ought to receive from food if they're to work properly—but it's simply impossible to obtain these salts in these days of modern cooking!

Therefore take Kruschen Salts in a glass of hot water every morning before breakfast—this quickly puts back these precious minerals into your system—and drives out harmful acids and toxins, assuring you enviable and glorious youthful beauty and health.

Little Helps For This Week

"I must work the works of Him that sent me, while it is day; the night cometh, when no man can work."—John ix. 4.

Rest not content in thy darkness, a

clod;

Work for some good, be it ever so

slowly;

Cherish some flower, be it ever so

lowly;

Labor!—all labor is noble and holy;

Let thy great deeds be thy prayer to

thy God.

—Frances S. Osgood.

Remember now and always that life is no idle dream, but a solemn

reality, based upon eternity and encompassed by eternity. Find out your task, stand to it; for the night cometh, when no man can work.

—Thomas Carlyle.

Persian Balm the creator and preserver of beautiful complexions. Tonic in effect and wonderfully stimulating. Safeguards and beautifies the most delicately-textured skins. Cools and relieves all skins flushed or irritated by weather conditions. Magical in results. A little gentle rubbing and a youthful freshness and daintiness is instantly created. Invaluable for softening the hands and making them flawlessly white. Truly the perfect toilet requisite for the woman who cares.

Had Eye On Australia

A curious map, now in the possession of the French Geographical Society, reveals that Napoleon Bonaparte once planned to invade Australia and annex it to France. The map is covered with notes written by Napoleon and contains the outline of his proposed attack. Prince Roland Bonaparte, descendant of the Emperor, presented the map to the society.

To think of a clever but cutting remark, and then not make it—there is a sign of nobility.

FREQUENT PAINS ?

NEVER let a throbbing head interrupt your shopping! Or other pain that Aspirin ends so quickly. These harmless tablets are an antidote for the most acute pain. Relief is almost instantaneous. Taken in time, they will break up a cold and head off discomfort. They'll relieve your suffering from neuralgia, neuritis, or the like, at any time. Thousands of

women depend upon Aspirin tablets every month to spare them from those pains peculiar to women. These tablets do not depress the heart; they may be used as frequently as there is need of their quick comfort. So, it's folly to endure any pain that Aspirin tablets could relieve so promptly. Get the genuine, which is always to be had at any drugstore.

ASPIRIN

TRADE-MARK REG.

GAS relieved

WHAT most people call indigestion is usually excess acid in the stomach. Food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention, it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water

neutralizes many times its volume in acid. The results are immediate with no harmful after-effects.

Once you learn this perfect way you'll never deal in any other manner with the headaches, gas, bloating, nausea, dizziness, indigestion, biliousness, etc., due to an over-acid stomach and bowels.

Be sure to get genuine Phillips'. It is always a liquid; never made in tablet form. Look for the name Phillips on the bottle. All drugstores sell it—50c.

were Calgary visitors this week and
returned on Tuesday.

YOUR HEALTH—A NEW YEAR'S RESOLUTION

Now that the milestone of the New
Year has been passed, the order of
the day is the keeping of the good
resolutions which a time honored cus-
tom holds for many of us. There is one
good resolution on which more than
any other depends the happiness of
the entire family, and which is within
the power of everyone to keep. It is
the resolve to live more closely ac-
cording to the simple laws which gov-
ern perfect health. Once get the habit
when the children are small and these
valuable health rules will become se-
cond nature, to be observed uncon-
sciously. As life proceeds we get an
increasing value on the worth of good
health and see in the golden hours of
youth and early infancy the ideal time
for the forming of life-long habits.

Mothers find it sometimes difficult
to inspire children with the desire to
keep clean their ears and neck to say
nothing about their teeth, but by keep-
ing what is known as the Health Game
with the accompanying Record, many
a youngster has unconsciously devel-
oped a cleanliness complex which af-
fords his entire family a deal of satis-
faction. The Junior Red Cross offers
a splendid system of daily hygiene to
all its members. The simple rules are
printed on a chart. By means of a re-
cord which the child himself marks as
a point of honour daily, the little du-
ties are observed.

As one parent said to the writer "I
was distracted with my family they
were so tiresome about the little de-
tails of personal cleanliness. When the
new teacher introduced the Junior Red
Cross into the school, there was the
greatest difference in the world, they
actually competed as to who would
be the best groomed in the morning
and now it is a pleasure to see them."

If you desire a Health Game record
with a Health Rule card, write to the
Junior Red Cross, 407 Civic Block, Ed-
monton.

PRESENTATION TO LADY WILLINGDON

On the termination of the Governor
General of Canada's term of office it
has been customary for the women of
Canada to present to the departing
Lady of Rideau Hall some fitting me-
mento of her life among us.

No doubt the desire to do this will
be particularly strong in the case of
Lady Willingdon who has shown such
sincere interest in the women of Can-
ada and who is personally known to
so many Canadian women, even in the
most remote parts of the Province.

With this in view a committee has
been formed in Ottawa under the di-
rection of Miss Mildred Bennett with
Lady Borden as Treasurer.

Mrs. Egbert and Mrs. Brownlee have
been asked to take charge of the col-
lection of the fund in this Province.
They realize that, owing to conditions,
women may not be able to contribute
what they wish but would like to em-
phasize that any small amount will
show a kindly spirit and interest and
will be appreciated.

Will you please send a subscription
to reach Government House, Edmonton,
not later than January 20th and pay-
able to either Mrs. Egbert or Mrs.
Brownlee. Acknowledgement of all sub-
scriptions will be forwarded from the
Government House, Edmonton, and a
full list of contributions will be sent
the National Committee. Remittances
should be made by marked cheque or
money order.
